

MR.MCKENIC 9 IN 1 TECHNOLOGY OIL

We offer an extensive product range to ensure that our customers will always be able to select a Mr McKenic® product to fit their schedule of maintenance and cleaning needs.

9-in-1 Technology Oil

Product description:

Product Code: ME1208

Mr McKenic® – 9-in-1 Technology Oil is a multi-functional product with a wide variety of applications with its lubricating, corrosion-inhibiting, penetrating and cleaning properties. An effective solution in many situations from lubricating moving parts to maintenance of equipment, Mr McKenic® – 9-in-1 Technology Oil is an essential product in every tool box.

Technically formulated with a low surface tension, Mr McKenic® – 9-in-1 Technology Oil has the ability to penetrate deeply and quickly to break up hardened grease, rust and dirt that cause friction. This excellent penetrating action frees seized mechanisms swiftly, leaving a lubricating film that further reduces frictional resistance to smoothen motion. Hence, effectively eliminates squeaks without any sticky residues.

In addition to the lubricating property, this hydrophobic film of Mr McKenic® – 9-in-1 Technology Oil displaces moisture from wet components, helps to reduce equipment servicing downtimes and prevents any potential electrical failure when water comes into contact with electrical connections.

This protective layer contains a package of corrosion inhibitors which makes Mr McKenic® – 9-in-1 Technology Oil an excellent anti-rust agent. Frequent applications will prevent corrosion from setting in, minimize effects of wear & tear or overheating of equipments and hence, in the long run, helps extend the lifespan of machinery.

•Product features:

- Low Surface Tension
- High Penetration Power
- Displaces Moisture & Prevents Short-Circuit
- Prevents & Remove Rust
- Lubricates
- Prevents Overheating
- Non-Flammable
- Odorless
- Withstands Temperature
- Cleans Stubborn Stains

Lubricates & Silences Squeaks
Excellent penetrating action allows product to quickly lubricate gears, hinges, locks, zippers, tools and chains. Effectively eliminates squeaks and leaves no sticky residue.

Removes & Prevents Rust
Breaks down rust to release seized or rusted metal parts, such as bolts, nuts, cables, valves and fasteners.

Releases Stuck Mechanisms
Super penetrating action works quickly to free stuck or seized parts, such as jammed wheel nuts, gears and other mechanisms, thereby allowing equipment to run smoothly.

Cleans & Protects
Breaks down hardened grease, tar, dirt and carbon stains to clean surfaces and form a corrosion-resistant barrier to help prevent rust and extends the operating life of equipment.

Displaces Moisture
Effectively drives out moisture on wet equipments such as electrical contacts, spark plugs on motorcycle engines and power tools.

For OSHA, ASME B30.9 and Manufacturer's Guidelines. Can fall if damaged, misused or overload. Inspect before use. Use only if trained. Do not exceed rated capacity. Protect from contact with edges. DEATH or INJURY can occur from improper use or maintenance
